

WYOB I

REGISTER/ENROL YOUR **PET**

Pet enrolment ensures the identification of your pet and provides important information about your pet. Especially in the case of lost and found.

Openitem's App software is now VN Animal detection enabled. Which means that the software has the built-in capability of recognising pet breeds and types. Complete your pet's profile by adding the required information. This includes name, gender, colour and id chip provided by your veterinary specialist. This will enable estate management to quickly identify your pet.
